Design HSE management digitally

Software specialist presented Quentic Community at the Arbeitsschutz Aktuell trade fair

Under the uniform name Quentic, EcoIntense has merged its products and businesses into a single, global brand identity. The HSE and CSR software specialist presented its new online community for the first time at "Arbeitsschutz Aktuell", a trade fair for occupational health and safety in Germany. The new forum allows software users to provide feedback, share expertise, and network with Quentic experts and partners.

Berlin, October 26th, 2018 – Gathering, documenting, evaluating, and relaying information: Everyday tasks for professionals from the areas of Health, Safety, Environment (HSE) and Corporate Social Responsibility (CSR). In the age of Industry 4.0, the integrated exchange of knowledge becomes increasingly important. The digitalization of business and production processes requires the intelligent networking of all parties. This is especially true for areas that affect the whole company, such as occupational health and safety and environmental protection.

With its software solution, Quentic supports seamless transitions between work steps and connects all HSE and CSR stakeholders in one system. At "Arbeitsschutz Aktuell", the company presented its new brand image, including the slogan "connect. engage. inspire". This brand positioning emphasizes that Quentic connects software and people, involves in a task-oriented manner, and generates enthusiasm for the entire HSE and CSR field – either via browser or app.

Promoting knowledge sharing and cooperation

"The direct exchange with our customers is especially important to us. Only through continuous interaction we are able to develop practice-oriented solutions," said Markus Becker, CEO of Quentic, at the trade fair forum. In the new Quentic Community, software users can provide feedback and engage directly with support and consulting staff. At the same time, it promotes sharing best practices with regard to specialist topics and their implementation in the software. Users from over 600 companies can help each other and expand their professional networks in doing so.

"Great challenges can only be overcome by working together. Digital technologies are changing the working world – and thus the requirements for HSE and CSR management. Our goal is to create clarity and guidance in an increasingly complex environment through our integrative approach. With the Quentic Community, we
